DAVID HARDIE SEED CO.,

DALLAS, TEXAS.

TO OUR FRIENDS AND PATRONS:

We are beginning the Century with a stock of carefully selected Seeds, which, for quality, we sincerely believe cannot be beaten in the United States.

The season just past was a very satisfactory one to us, we having gained many friends by the purity and vitality of the seeds we supplied; we have received numerous letters of commendation, and, what was better, our customers have recommended their friends to try us, and from them we have received repeated orders; all this goes to show that our method of supplying good, fresh seed at fair prices. has its sure reward.

Our long experience in this Southern country, enables us to se suitable to our soils and climate: every article is carefully selected, good

our first object, we never sacrifice quality to cheapness.

It has been our observation that great distress and disappointment caused by cheap seeds, as, in the majority of cases, cheapness means poorly grown or old seeds. Our seeds are all fresh, and, to the best of our knowledge, strictly true to name, and we can assure you that any orders you may entrust to us will be filled with the object of keeping your patronage as long as you continue to plant seeds. Hoping to be favored with an order, we are,

Respectfully yours,

DAVID HARDIE SEED CO.

HOW TO REMIT, ETC.

With every catalogue we always send an Order Sheet and addressed envelope, these will be found convenient when ordering.

Name and Address—We earnestly request our correspondents to be particular and give their full name, Post Office and State, distinctly written each time they address us; overlooking any of these essential items in an address may be the cause of vexatious delay.

Cash should always Accompany the Order—Money may be sent at our risk in the following manner: Post Office Order, Draft on New York, Express Company Money Order or by Registered Letter. Small amounts may be sent in two cent postage stamps.

Goods C. O D.—No goods will be sent by us C. O. D. unless one quarter the amount accompanies the order.

In comparing our mail prices, especially on heavy seeds, such as peas, beans and corn, by the quart and pint, and other seed by the pound and quarter pound, you must bear in mind that we pay the postage.

Warranty—We send out only seeds that will, to the best of our belief, give entire satisfaction; immunity from error being however unattainable and success always so largely dependent on outside influences, it must be expressly understood that we give no warranty, exp. sed or implied, and we will not be held in any way responsible for the crop. If the purchaser does not accept these seeds on these conditions, they must be returned conce, and any money paid us for them will be refunded.

VEGETABLE SEEDS

0F

STANDARD MERIT.

The Varieties of **Vegetable Seeds** offered by us, are limited to those, which in our opinion, are best suited to the Soils and Climate of this **Southern Country**, keeping before our patrons the good old reliable sorts, which, if not novel, can be depended on, in the end it is fine vegetables that are wanted, not so much novel varieties; however, any novelty we may come across, of proved merit, will be at once added to our list, but we refrain from offering anything of which we have no knowledge.

Our Prices Include Postage on Packets, Ounces, Quarter Pounds and Pounds, Pints and Quarts of Vegetable and Flower Seeds. If the purchaser desires to pay his own express or freight charges, he may deduct 10 cents per pound and 15 cents per quart from the prepaid rates here offered, where so requested and the amount is mentioned at the bottom of the order, we will add extra seeds for such amounts not deducted.

Liberal Discount off All Seeds in Packets and Ounces.

Purchaser	remitting	\$1.00	may	select	Seeds	in	Packets	and	Ounces	amounting	to \$1.25

Beans.

We have again to report this season's crop of Beans as being very short, some varieties of Pole Beans being almost a total failure. We were fortunate in contracting for our needs very early, and will give our patrons, who buy from us early, the full benefit of these purchases as long as they last. Large planters of Beans can rely on getting strictly firstclass stock of new crop and true to name from us.

Remember, our pint and quart prices include postage; if want press, at buyers expense, deduct 8 cents per pint and 15 cents per qu				r Ex-
DWARF, OR BUSH BEANS	•			
Buschbohnen. CULTURE—Drop the Beans, two or three inches apart, in rows stand two feet apart; cultivate only when dry, draw the soil slightly towards green beans in six to eight weeks; sow every two weeks for a successi September.	ding e	They	n inc	make
Henderson's Bush Lima, the most successful bush lima for the Southern States, and the only one we would recommend as a sure cropper. It is much planted by the Market Gardeners, is at least three weeks earlier than any of the climbing limas,	Pkt.	Pint	Qt.	Peck
and is a continuous and abundant bearer until frost Burpees' Large Bush Lima, a true bush form of the Large White Lima, does well if season is favorable, in the event of early	5	25		2.00
droughts the pods do not fill out well GREEN PODDED SNAP BEAL	NS.	35	60	•••••

Our Beet Seed has proved the purest and best the market gardeners of Dallas have ever been supplied with, many of them informed us they made extra money by having the proper kind of early beets; Southern gardeners should try our Early Eclipse and Egyptian Beet seed if they want to have the first and best in the market.

CULTURE—Sow as soon as the laud will permit, and for general crop about the middle of April; sow in drills 15 inches apart and thin out to four inches; for winter use, sow the turnip varieties about July.

Pkt. Oz. 1/21b. lb.

varieties about July.	Pkt.	Oz.	¼1b.	1b.
Extra Early Egyptian Blood Turnip. (Fig. 5). The well				
known standard early market sort, color deep red, tender and				
sweet; form similar to Flat Dutch Turnip	5	10	15	50
Early Eclipse (Fig. 3). Very early, round rooted, dark red, very				
desirable sort for bunching	5	10	15	50

long beet, of most delicious flavor	5	10	25	75
Mangel Wurzel. (Stock Beets) see "Farm Seeds."				

Brussels Sprouts.

Brusseler Sproffen.

A very desirable vegetable and desérving of a more general cultivation. Culture same as Cabbage.

 Cabbage.

Kopfkohl. Chou Pomme.

The Cabbage Seed offered by us is choice American grown and of the very best strains; a cabbage crop is much dependent on the quality of the seed, cheap imported cabbage seed generally proves dear at any price.

CULTURE—All Cabbages do best in strong, well manured, and well cultivated soil. For early crop sow seeds of the early varieties in hot beds, or in a box that can be housed, anytime from middle of December to end of January, plant out end of February or beginning of March, in rows two feet apart and 18 inches between plants in row; for later cabbages sow in March and plant out April In Southern Texas cabbage can be sown in September and planted out beginning of November. To prevent the small plants being attacked by cabbage fly, dust some tobacco powder or "Slug Shot" on them.

Farly Jersey Wakefield A very popular variety with market plants of the contraction of the con

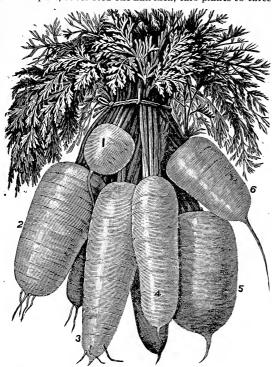

Early Jersey Wakefield. A very popular variety with market	Pkt.	Oz.	1/41b	. lb.
gardeners for early use, and is considered the best early cab- bage in cultivation; it has a fine solid head and is of good size	5	20	60	2.00
Charleston or Large Wakefield is five or six days later than	J		0 0	00
the Early Jersey Wakefield; the heads are nearly one half				
larger and very solid; it is very compact in growth and does				
not burst open when ripe, like many of the early sorts	5	25	75	2.50
Earliest of All. A few days earlier than Wakefield, the heads	_			
are oblong, rounded at top	5	15	50	1.50
Early York. The old well known sort, the heads are small, round,	5	10	25	1.25
slightly heart-shaped	5	$\begin{array}{c} 10 \\ 10 \end{array}$	35 35	1.25 1.25
Early Winningstadt. A fine variety for summer use; heads large	J	10	00	1.20
and pointed, tender and solid.	5	15	40	1.40
Henderson's Early Summer. We consider this the champion			-	
Early Cabbage for the South; it is the earliest large heading				
cabbage and a great favorite with market gardeners; handsome				
heads, flat or slightly rounded; a good keeper	5	15	50	1.75
Danish Ball-head, a very handsome, hardy, imported cabbage;				
has proved to be one of the very best winter sorts; the heads				
are of good marketable size, not quite so large as Flat Dutch,	-	0.0	0.0	0.00
but very hard, round and fine grained Early Flat Dutch, a good all round cabbage, a sure header, and	5	20	60	2.00
valuable for general crop	5	15	40	1:50
Early Drumhead. Heads round and flat; comes in after Hender-	9	10	10	1.00

Carrots.

Mahren oder Gelbe Rueben.

Carrote.

CULTURE—For early crops sow in spring, as soon as the ground can be worked, in drills 15 inches apart, cover seed one half inch, thiu plants to three or four inches in the row.

Earliest Red Horn or French Forcing (Fig. 1). A favorite carrot of small size, prized on account of its extreme earliness and superior flavor; best for forcing. Pkt. 5c., oz. 10c., 11b. 20 cts., lb. 65 cts.

Oxheart or Half Long Guerande.

(Fig. 5). This is one of the most valuable, either for family use or market; it is of a most beautiful shape and color. Pkt. 5 cts., oz. 10 cts., ½lb. 20 cts., lb. 65 cts.

Danver's Half Long Orange.
(Fig. 6.) One of the most productive; roots large but short, tapering abruptly at point, sweet and tender. Pkt. 5 cts., oz. 10 cts., ½ lb. 20 cts., lb. 60 cts.

ed (Fig. 4). Is a model variety and earlier than the Danver's; it is a very saleable market carrot. Pkt. 5 cts., oz. 10 cts., ½lb. 25 cts., lb. 75 cts.

	I At.	UZ.	74.10.	10.
James' Scarlet Intermediate, is of a deep red color, and exceed-				
ingly delicate in flavor; root beautifully tapering and pointed,				
we strongly recommend this variety to market gardeners	5	10	25	75
Long Scarlet Altringham. Long red, very productive, crisp and				
	5	10	20	60
Improved Long Orange (Fig. 3). Best variety for late field cul-				
ture, good for table use and suitable for stock feeding	5	10	20	60

Cauliflower.

Collards.

Blatterkohl. Chou Cabu.

CULTURE—Sow seed as for cabbage in June, July or August for succession; transplant when a month old.

Celerie.

Celery.

Sellerie.

Soup Celery, see "Herbs."

CULTURE—Sow in March or April and rake the seed in lightly; wate sun, set out when plants are 6 inches high, in trenches 2½ feet apart; plants				
hot weather, when tall enough it should be earthed up to blanch it.	701-4	Oz.	¼lb.	lb.
	PKt.	Oz.	½1D.	10.
White Plume, a handsome, thick ribbed variety of a yellowish				
white color, very crisp, is easily blanched	5	15	50	
Giant Pascal, easily blanched and fine keeper, large late sort, of				
good flavor	5	15	40	
Golden Self Blanching, a grand variety on the style of "White				
Plume," except that it is golden yellow	5	20	60	
Celeriac or Turnip Rooted Celery, has edible roots used for				

Early Garden and Sweet Corn.

Velschkorn. Mais.

soups and stews..... 5 20 50

CULTURE—Plant in hills three feet apart, leave two or three plants to the hill; where ground is strong, dwarf varieties, like Adam's Extra Early, can be planted in hills $2\frac{1}{2}$ feet apart.

Remember, our pint and quart prices include postage; if wanted by Freight or Express, at buyers expense, deduct 8 cents per pint and 15 cents per quart from price.

	Pkt.	Pint	Qt.	Peck
Adam's Extra Early, the hardiest and earliest corn we have (not				
a sugar corn,) makes roasting ears in six weeks after planting;				
ears small, and only recommended for first planting	5	20	35	75
Adam's Early, an early market variety, similar to Extra Early				
Adams, but much larger; this corn is well adapted to the South				
and we strongly recommend it	5	20	35	75
Early White Cory, sweet, this is undoubtedly the best extra				
early sweet corn; those desiring a first early variety can make				
no mistake in planting the Cory, as it is of luscious quality; it				
is of dwarf habit and can be planted two and a half feet apart				
each way	5	20	35	1.00
Country Gentleman, sweet, this we consider the par excellence				
of Sweet Corn, it is undoubtedly a variety of great value and			•	
is especially recommended for private gardens, as there is no				
variety can equal it for sweetness or delicacy of flavor, it is				
also very productive, producing three to five ears to the stalk;				
the grains are exceedingly deep and crowded irregularly on the				
cob, we would warn purchasers, not to consider the seed of this				
variety poor when they get it, as the prime seed of "Country				
Gentleman" has a decided look of poverty about it	5	25	35	1.00
Stowell's Evergreen, sweet, this is the most popular variety				
with gardeners and canners, for late use; it is very productive,				
ears of a large size, grain deep, very sweet and tender and				
remains for a long time in an edible condition	5	20	35	75
Hickory King and White Pearl are both good to plant for roast-				
ing ears, for prices see "Field Corn."				
Field Corn see "Farm Seeds."				

Corn Salad or Fetticus.

Gurke.

Cucumber.

Concombre.

CULTURE—Cucumbers should not be planted until the ground gets warm, unless you are prepared to protect them during cold storms. Plant in hills 6 feet apart each way, enrich the hills with a quantity of decomposed manure or packing house fertilizer, scatter 10 or 15 seeds on each hill, cover one inch deep and press the soil firmly over them; thin out to three or four plants to the hill; never allow any of the fruit ripen on the vines, as they will cease setting fruit as soon as seed commences to mature.

Improved Early White Spine, this is a popular variety of				
medium size, light green color with white spine; a good kind				
for shipping; is good for forcing as well as for out of door culture	5	10	20	50
Evergreen White Spine, differs from the above in retaining a				
beautiful green color in all stages of its growth; is of good size,				
crisp and tender and a good shipper	5	10	25	60

Mustard.				
Senf. CULTURE—For Salad and greens, sow broadcast early in Spring, als		utard		
	o in th	e Fan		
Southern Giant Curled, the best for greens, and is better suited				
for the South than any other mustard	5	10	25	75
White London, used for salad when young		5	15	40
Black or Brown, similar to white, more pungent		5	15	40
Okra.				
Eszbare Hibiscus		mbau	đ.	
CULTURE—Sow in drills about three feet apart and thin out to one fe	oot ap	art.		
White Velvet, an improved variety, of medium height, bears an				
abundance of white, smooth, tender pods		5	15_{-}	50
Lady Finger, a very fine variety, pods long and slender, fine flavor		5	15	50
Long Green, long ribbed pods		5	15	40
Dwarf Green, early and very productive, smooth pods		5 .	15	40

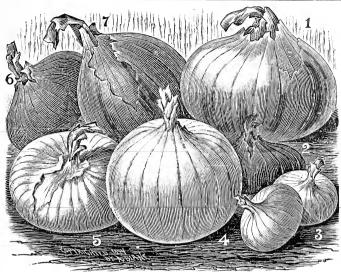

Onions.

Zwiebel. Oignon.

Our onion seeds are the very best procurable, grown especially for us by one of the most careful growers in California. Last season the purity and vitality of those we sold, were acknowledged by our customers to be ahead of any seeds they had previously got elsewhere; onions raised from our seed took the First Premium at Texas State Fair, 1900. Large growers of onions would do well to write us before placing their orders for seed.

CULTURE—To grow fine onions, the ground should be well manured, you cannot get it too rich, they require more or less manure every crop; the land should be well plowed and pulverized before planting; for large onions from the seed, sow in drills about 2½ feet apart, thin out to about 6 inches in the drills, and keep weeds cleaned out. Feb. is early enough to sow, you can also sow again early in the Fall for bunch onions.

	Pkt.	Oz.	1/4lb.	1b.
Extra Early Red, (Fig. 2), an extra early, good yielder; medium				
size, solid and heavy, keeps well	5	15	35	1.25
Large Red Wethersfield, (Fig. 6) a leading variety, is very pro-				
ductive and a fine keeper; grows large, skin purplish red	5	10	35	1.25
Yellow Globe Danvers, (Fig. 7), a very desirable standard vari-				
ety, good keeper and productive	5	10	35	1.25
Silver Skin or White Portugal, (Fig. 4), a large, mild onion of				
fine flavor, very desirable for family garden, fine for pickling	5	20	6 Ò	2.00

	Pkt.	Oz.	1/41b	lb.
Australian Brown, a new variety which is fast becoming a favorite having many good qualities to recommend it; it is of globular shape and brown in color; flavor is mild and sweet, it is very solid and proves to be a splendid keeper	5	15	40	1.30
Giant Yellow Prizetaker, (Fig. 1), the best of all onions for a field crop; grows to a large size, form very attractive, being almost globe shaped, flesh pure white, fine grained, mild and				
delicate flavor, is a splendid keeper	5	15	40	1.30
matures early and very uniform in size; flesh is snow white, tender, mild and sweet; a good keeper	5	20	60	2.00
Extra Early White Pearl, a very early white variety, transparent like a pearl, of flat form, very mild and fine flavored, best suited for a bunch onion, as it does not keep well	10	20	70	2.40
paler red than Red Wethersfield; in South Texas it should be planted in the Fall not earlier than October, in Middle and North Texas, it may be sown in January and February Onion Sets, see "Roots and Plants."	5	15	40	1.50
Parsley.				
Petersilie. CULTURE—Early in Spring, sow in rows 1 foot apart, can also be so	own in	Pers		nd all
winter in the South.				
Plain Parsley, dark green leaves, good for seasoning Double Curled, very beautifully curled, used for garnishing	5 5	$\frac{10}{10}$	$\frac{20}{20}$	60 60
Triple Curled, very thickly curled and moss like	5	10	$\frac{20}{20}$	60

Parsnip.

Pastinake.		Panai	s.	
CULTURE-In early Spring sow in drills fifteen inches apart, thin out	to siz	t inche	s.	
Large Sugar or Hollow Crown, the only variety for the South.	5	10	20	50

Peas.

CULTURE—Plant early varieties beginning of February, they are usually planted in double rows, three to four feet apart, stake those requiring it, when about six inches high; keep them clean and earth up.

Remember our pint and quart price include postage, if wanted by Freight or Express at buyer's expense, deduct 8 cents per pint and 15 cents per quart from price.

DWARF	VARIETIES.

Red Cluster. a new type of Chili: bright red pods in bunches	5	25	75

Potatoes.

See "Roots and Plants."

Pumpkin.

Kurbis.

We would strongly recommend the planting of pumpkins as they make splendid feed for hogs and cattle; they do well planted in corn, every fourth hill in every fourth row may be planted in pumpkin seed.

CULTURE—When weather is warm plant in hills ten to twelve feet apart, dropping four seeds a hill.

Large Cheese, flat, one of the best for family use, flesh yellow, thick and of excellent quality. Pkt. 5 cts, oz. 10 cts., \(\frac{1}{4}\) lb. 20 cts., lb. 60 cts.

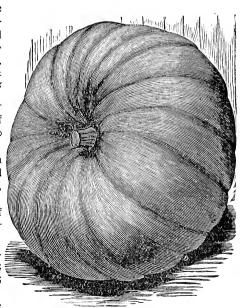

Cashaw, (Crooknecked), grows to a medium size, color light yellow and is the best for table use. Pkt. 5 cts., oz. 10 cts., \(\frac{1}{4}\) lb. 20 cts., lb. 60 cts.

King of the Mammoths, the largest of all pumpkins, weighing at times over 150 lbs., grown mostly for show. Pkt 10 cts., oz. 15 cts., ½ lb. 40c., lb. \$1.50.

Large Yellow Field, very productive; grown for stock. Oz. 5 cts., ½ lb. 15 cts., lb. 35 cts.

Mammoth Potiron, another very large variety, flesh yellow and of good quality. Pkt. 10 cts., oz. 15 cts., ½ lb. 40 cts., lb. \$1.50.

Potiron.

KING OF THE MAMMOTHS.

Radish.

Radieschen oder Rettig.

Radis

CULTURE—The soil for radishes should be light, rich and well pulverized, as their mild and crisp qualities depend much on their rapid growth. For very early use sow in mild hot beds in January, and in open ground as soon as the ground can be worked; for succession, sow at intervals of 10 or twelve days, they also do well sown in the fall.

TURNIP SHAPED VARIETIES.

·	Pkt.	Oz.	1/41b.	1b.
Non Plus Ultra, deep scarlet, (forcing) the finest of its kind,				
matures in 18 to 20 days, white fleshed, very crisp and tender.	5	10	25	75

Tomato.

Liebesapfel. Tomate.

CULTURE—For early crops sow in January and February in pots or boxes, and place near a window or in spent mild hot beds, keep well watered, when plants are three inches high, transplant into another frame to remain until ready for planting out, this makes them strong and stocky. If you wish the first fruits that set to ripen quickly, pinch off the tops of vine and later fruit shoots; all vining varieties ought to be staked and tied up.

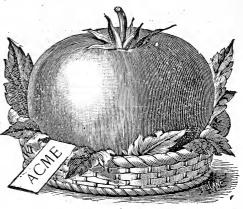

Our Seed is from Livingston the famous Tomato grower, and quantities of one ounce and upwards, will be supplied in packets bearing his seal.

Livingston's Stone, is a great favorite with Southern growers

and market gardeners; very large, perfectly smooth, bright color 5 25 75

Livingston's Early Acme, the earliest real good tomato, very productive, of medium size and always handsomely formed, color purplish red. Pkt. 5 cts., ož. 25 cts., 1 lb. 75 cts.

Livingston's Beauty, the great table and market sort, of distinct color, being glossy crimson with a tinge of purple. It grows in clusters of four to six large fruits, models in shape; flesh very firm; ripens up nicely when gathered green and for shipping and early market it cannot be excelled. Pkt. 5 cts., oz. 25 cts., ¼ lb. 75 cts.

	Pkt.	Oz.	¼lb.	lb.
Livingston's Favorite, one of the largest, perfect shaped red				
tomatoes in cultivation; flesh solid, bears shipping long dis-				
tances; fine canning variety	5	25	75	
Livingston's Dwarf Champion, is extra well adapted to Texas,				
many gardeners plant no other variety; it is very stocky, grows				
upright to about two feet, does not require staking; very pro-				
lific, fruit round, smooth and very meaty	5	25	75	
Yellow Pear Shaped, (Livingston's), fine for preserving and				
pickling; fruit bright yellow, true pear shaped, solid	5	30		
We can also offer the following varieties in bulk; this seed we had				
grown for us by another first-class tomato seed grower.				
Acme, described above	5	15	50	1.50°
Favorite, described above	5	15	45	1.25
Perfection, described above	5	15	45	1.25
Paragon, is very solid, of bright reddish crimson color, heavy in				
foliage and protects its fruit; productive and long bearing, is a				
good shipper and no praise can be too high	5	15	45	1.25
Royal Red , for the shipper and private gardener, this is a first-class	1			
main crop variety, not a single essential point is lacking, it is				
very productive, color a vivid red	5	15	50	1.50

TURNIP.

Weisseruebe. Navet.

CULTURE—For early spring crop sow the early flat varieties, as soon as ground will permit, either broadcast or in drills 14 inches apart, thin out to 5 or 6 inches, for fall or main crop, sow when seasonable from July to October; all varieties do well in the Fall.

	I Kt.	OZ.	7410.	100

Insect Destroyers.

Hammond's Slug Shot, destroys all insects injurious to Potatoes, Cabbage, Squash, Melons, Cucumbers, Beets, etc., also lice on rose bushes and other flowering plants. This preparation, though death to insects does not injure the plants, in fact it is a fertilizer to them; thoroughly dust the powder over the infected plants. Price, 5 lbs. 35 cents, 10 lbs. 65 cents. Dusters for applying "Slug Shot" two sizes; one half Gallon 35 cents, Gallon 45 cents.

Tobacco Dust, good for killing garden pests on flowering or vegetable plants; finest quality 10 cents per lb., \$5.00 per 100 lbs.

The Complete Garden Bellows. You can get under and over the leaves with it; very useful; price \$1.25. All F. O. B. Dallas.

FARM AND FIELD SEEDS.

Mangel Wurtzel or Stock Beet.

We have been much pleased to see the yearly increasing demand for mangels; they are unquestionably what are needed in our dry climate; besides being a succulent food for cattle, they tend to keep them healthy, increase the flow of milk in cows, and greatly hasten the fattening of stock for market. A yield of one thousand bushels to the acre is not unusual and we would strongly advise every farmer with stock to try an acre or two of mangels.

CULTURE—To grow well, mangels require a deep soil, plow and subsoil a foot to eighteen inches and apply plenty of rich stable manure, or 500 to 600 lbs. Packing House Fertilizer, to the acre; Sow in drills two feet apart thin out to 1½ feet, five pounds will plant an acre.

	Prepaid Oz. ¼ lb. lb.		
	Oz.	⅓ lb.	lb.
Mammoth Long Red Mangel, a very large well formed variety, blood			
red, very nutritious	5	15	40

sugar, very hardy and large yielder	5	15	4.0
Imperial French Sugar Beet, very valuable for stock food and sugar			
producing	5	15	40
Will sell five pounds and upward of any of above, express or freight pa		purch:	aser
at 25 cents per pound.			

Peanuts.

Peanuts can be planted from April to July, they yield well in this country and are a paying crop.

Small Spanish, very prolific, more solid and sweeter than the large, and easier cultivated. Prepaid, per lb. 25 cents. Not prepaid, per peck 60 cents, bushel \$2.00.

Large White, prepaid, per lb. 25 cents. Not prepaid, per peck 60 cents, per bus. \$2.00

Sugar Cane and Forage Plants.

For those living in sections subject to drouth we cannot too strongly recommend the planting of Sorghum, Kaffir Corn, etc., as they will almost certainly give them fodder the driest of seasons; all regions are at times subject to drouth, we therefore think every farmer should be on the safe side and plant some of these drouth resisting forage plants.

Seed Field Corn.

The corn we offer is grown expressly for seed purposes, it is with one or two exceptions, such as Mexican June, northern grown; we have found from practical experience, that northern seed corn is the surest, it is made before our dry weather generally begins.

Champion White Pearl, this is a very handsome white corn, the grain is pure white, heavy and long, ears large. It is a fine meal corn, and is also planted for early and late roasting ears in Spring and Fall, matures in 90 days. Prepaid, per lb. 20 cts., 3 lbs. 50 cts. Not prepaid, per peck 40 cts., ½ bushel 70 cts., bushel \$1.25.

Improved Leaming, a yellow Dent variety, small red cob with deep, long grain: very prolific and matures in 90 days. Prepaid, 1 lb. 20 cts., 3 lbs. 50 cts. Not prepaid, per peck 40 cts., ½ bushel 70 cts., bushel \$1.25.

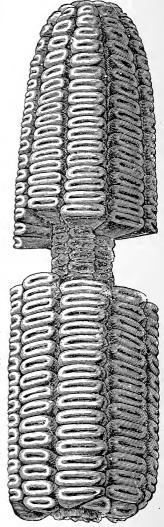

Hickory King, this corn comes nearer being all corn and no cob than any other, the corn being so large and the cob so small, if you break ear in two, one grain will cover end of cob; nearly all stalks bear two ears, and we consider it one of the best corns for Texas. Matures in 100 days. Prepaid per lb. 20 cts., 3 lbs. 50 cts. Not prepaid, per peck 40 cts., per ½ bushel 70 cts., per bushel \$1.25.

in Texas, stalk grows seven to eight feet and sets the ears $3\frac{1}{2}$ to 4 ft. from the ground, ears average ten to twelve inches long; is very early and is a great yielder. Matures in about 95 days. Prepaid, per lb. 20 cts., 3 lbs. 50 cts. Not prepaid, per peck 40 cts., $\frac{1}{2}$ bushel 70 cts., per bushel \$1.25.

Mexican June Corn, this is purely a Southern corn, has been grown for years in the droughty districts in the Southwestern part of the State and in Northern Mexico. Should not be planted before June (if planted early will grow nothing but fodder), will mature if planted by 15th July. Market gardeners can plant it later for roasting ears, for which purpose it is very valuable. Prepaid, per lb. 20 cents, per 3 lbs. 50 cent. Not prepaid, per peck 60 cents, ½ bushel \$1.00, bushel \$2.00.

Early Mastodon, a yellow Dent Corn which we can strongly recommend for main crop, it is very early, makes large, heavy ears and is very productive; the grain is long, not very large, but closely packed on cob. Prepaid, per lb. 20 cts., 3 lbs. 50 cts. Not prepaid, per peck 40 cts., ½ bushel 70 cts., bushel \$1.25.

Golden Beauty, this variety has ears of perfect shape, grains very large and filled out to extreme end of cob; well suited to Texas. Matures in 110 days. Prepaid, per lb. 20 cts., 3 lbs. 50 cts. Not prepaid, per peck 40 cts., per ½ bushel 70 cts., per bushel \$1.25.

HICKORY KING.

Pop Corn.

Monarch White Rice, the best to plant for market. Prepaid, per lb. 20 cts., 3 lbs. 50 cts. Queen's Golden, pops a beautiful creamy white, fine flavor. Prepaid, per lb. 20 cts., per 3 lbs. 50 cts.

White Pearl, prepaid per lb, 20 cts., per 3 lbs. 50 cts.

Broom Corn.

Broom Corn Straw is now very scarce and high priced, therefore this would be a favorable time to plant a few acres.

Improved Evergreen, the fibre is long and fine and keeps its green color well. Prepaid, per lb. 20 cts. Not prepaid, per peck 40 cts., per bushel \$1.25.

Stock Peas.

Besides being an A I Feed for stock, the straw acts as a good fertilizer to the land;
we consider this one of the best paying crops a farmer can raise.

Flax Seed
Dwarf Essex Rape , makes a fine winter pasture for stock, especially sheep; sow Septem-
ber or October
Sunflower, Large Russian, good for chickens
Giant Beggar Weed, makes splendid forage for stock, grows very rank and having long
roots, resists drouth
Spring Vetches or Tares, a good forage plant, does well planted in fall, prepaid, lb. 25c.

Cotton Seed.

We have had many inquiries for improved varieties of cotton seed, causing us to diligently look for what have done well here, both as regards staple and yield. All during the past Fall we have been closely connected with large cotton buying firms, all of whom tell us there is urgent demand for cotton of good staple; at the same time we offer only those that have yielded well.

Allen's Improved, is an extra long staple variety, measuring from 1\frac{1}{8} to 1\frac{1}{2} inches; it has proved to be the best yielding long staple cotton in this district. Cotton of this variety sold on the Dallas market at one cent per pound more than any other of the same grade, sold same day; it is not easily blown out of the boll. We would strongly advise our farmers to put in part of their crop, at least, in this fine variety. Price \$1.00 per bu. f. o. b. Dallas, 5 bu. \$4.50.

Hawkin's Extra prolific, has yielded more to the acre, the past year, than any other variety; the grower from whom we secured our seed, made two bales of cotton to the acre; it has a good staple and, like "Storm Proof," is not easily blown out of the boll; this cotton took seven premiums at the last Texas State Fair. Price \$1.00 per bu., f. o. b. Dallas, 5 bu. \$4.50.

Storm Proof, this variety we have always considered one of the most reliable and although the staple is not so long as the other two varieties, it is fairly good; it has five locks, and although hard to blow out of the bolls, it is easy to pick. Price 75 cts. per bu., f. o. b. Dallas, 5 bu. \$3.00.

Buckwheat.

Sown principally in Texas for bees, generally planted in May and June. Silver Hull, prepaid, per lb. 25 cts.; not prepaid, per peck 75 cts., bushel \$2.50. Japanese, prepaid, per lb. 25 cts.; not prepaid, per peck 75 cts., bushel \$2.50.

Grass and Clover Seeds.

Prices of Grass and Clover Seeds given below are subject to fluctuation of the market but the purchaser may depend on having them at the price ruling from store the date of shipment, and of the best quality, and that we will always send as much seed as the money received will pay for. Price on one pound is quoted postpaid, larger quantities by freight or express at buyer's expense.

Alfalfa Clover, is the most valuable forage plant we have, particularly well adapted to Texas soil and climate, and, although a great yielder, it does not impoverish the soil, but rather improves it; it does best in deep, loamy soil, well cultivated, and we think ought to be planted by itself, as oats, barley, etc., are cut at the very hottest time, exposing the tender plant to the strong sun. Sow early in spring, or in fall, September to November if seasonable, not less than 25 lbs. of the best seed to acre: Highest Grade Seed (the finest to be had) 25 cts. per lb., \$12.00 per 100 lbs.; cheaper grades \$9.50 to \$11.00 per 100 lbs.

Crimson Clover, an annual variety, grows about two feet high, is an immense yielder, and after cutting immediately commences to grow again; sow 15 lbs. to acre. 25 cts. per lb., \$12.00 per 100 lbs.

Alsike or Swedish Clover, hardy and stands dry weather; sow 8 to 10 lbs. per acre-35 cts per lb., \$2.00 per 10 lbs.

White Dutch Clover, an excellent clover for pasture, also good for lawns; flowers very sweet, 40 cts. per lb., \$2.00 per 10 lbs.

Red Clover, sow in winter in the South, 8 to 10 lbs. to acre. 30c. per lb., \$1.50 per 10lbs. **Bokhara or Melilotus**, sow early in spring, 8 to 10 lbs. to acre. 40 cts. per lb., \$2.50 per 10 lbs.

Japan Clover, a low spreading variety, will stand excessive drouth; sow 15 lbs. to acre.

40 cts. per lb., \$2.50 per 10 lbs.

Bermuda Grass, the most suitable grass for the South, is very valuable for its drouth resisting properties, and for a summer pasture it should be planted everywhere; it also makes a beautiful lawn, and is good to sow on embankments, as it binds the soil together with its shoots and roots. Sow when the ground gets warm, March to May or in early fall; 4 to 5 lbs. to acre. Price prepaid, 90 cts. per lb., \$7.50 for 10 lbs. not prepaid.

Meadow Fescue, True English Blue Grass, is a fine pasture grass, will grow in the shade under trees, it succeeds best on moist soil, sow in spring or fall, 30 lbs. to the

acre. 30 cts. per lb., \$1.50 per 10 lbs., \$12.00 per 100 lbs.

Kentucky Blue Grass, well known pasture grass, and combined with white clover makes a good close lawn grass, for which purpose sow 50 lbs. to the acre, for pastures 25 lbs. is sufficient. 30 cts. per lb., \$1.50 per 10 lbs., \$12.00 per 100 lbs.

Orchard Grass, well adapted for sowing under trees; makes good hay and grazing; sow

25 lbs. to the acre. 30 cts. per lb., \$1.75 per 10 lbs., \$15.00 per 100 lbs.

Red Top, a good grass for moist soils. 30 cts. per lb., \$1.50 per 10 lbs., \$12.00 per 100 lbs. Timothy, the finest grass for hay, sow 12 lbs. to acre. 20 cts. per lb., 75 cts., per 10 lbs. \$6.00 per 100 lbs.

Colorado Grass, a Western Texas grass, seeds itself like crab grass; makes fine hay and good grazing, sow 25 lbs. per acre. 25 cts. per lb., \$1.25 per 10 lbs., \$10.00 per 100 lbs.

Rescue Grass, comes to the rescue when other forage fails; makes splendid winter pasture; sow 30 lbs. per acre. 25 cts. per Jb., \$1.25 per 10 lbs.

Mixed Lawn Grass, a very fine mixture of grasses and white clover, does not run like Bermuda grass; sow 30 lbs. per acre. 30 cts. per lb., \$2.00 per 10 lbs.

For Other Varieties, write us for prices, etc.

Flower Pots.

Shipped at buyer's risk and expense.

Four inch, per dozen 35 cents. Five inch, per dozen 50 cents. Six inch, per dozen 75 cts. Eight inch, per dozen \$1.25. Ten inch, per dozen \$2.50.
